**Key words:** errata, addenda – binaries: close – binaries: spectroscopic – subdwarfs.

The paper ‘Radial velocity measurements of Subdwarf B stars’ was published in MNRAS, 415, 1381 (2011). We have since discovered that some errors exist in table 2, which contains a list of radial velocity measurements for 28 subdwarf B binaries. The two affected objects are EC21556-5552 and EC22590-4819. For each of these objects, three of the radial velocity measurements listed in the table are incorrect: the correct values have been replaced with measurements which were obtained for a different object. These are typographical errors which occurred during the formatting of this particular table and as such the other tables, figures, results and conclusions presented in the paper are unaffected. In Table 1 below we list the correct radial velocity measurements for EC21556-5552 and EC22590-4819. We are indebted to Dimitri Pourbaix for bringing these errors to our attention.

**Table 1.** Radial velocity measurements for EC21556-5552 and EC22590-4819. These values replace those listed in table 2 of the original paper.

HMJD	RV (km s <sup>-1</sup> )	HMJD	RV (km s <sup>-1</sup> )
<i>EC21556-5552</i>		<i>EC22590-4819</i>
