^aBold *p*-values refer to significant results. Data for LF1 (La Ferrassie 1), LC1 (La Chapelle-aux-Saints 1), and LQH5 (La Quina H5) are original from this work. In the all other cases, it has been extracted from the bibliography: Sarrians and Fontbrégoua Neolithic assemblages from Villa and Mahieu (1991); Agris Mesolithic site, AUZAI (Châteliers du Vieil-Auzay from the Neolithic period), the Neolithic site of Corconne site and the Chalcolithic site of Villedubert from Jordana et al. (2013); and SH (Sima de los Huesos Middle Pleistocene hominins) from Sala et al. (2015a, 2016). Fontbrégoua, Agris and Châteliers du Vieil-Auzay are considered typically fresh bone fractured samples. Sarrians, Corconne,
